

Removing Plaques Inside and Out!

It also works

as a High Performance Tongue Cleaner or Gum Massager

Cylindrical Toothbrush from Japan

Ultrafine high density bristles approach finely backside of the front teeth, grooves of the molars, such a place difficult to brush. It also works as a serviceable gum massager or a high performance tongue cleaner. I recommend it for every person as a multi-purpose oral care device.

Dr. Hiroshi Ono, a member of JDA

Oral health is very important in playing sports. Force would be loaded on molar teeth while patting as well as shooting. The coloring of gums looks well after using the Cylindrical Toothbrush. The feeling backside of front teeth freshen up is marvelous. I want you to try this amazing item.
